DIRECTOR'S REPORT

During the period covered by this report a considerable amount of work in regard to reorganization has taken place. As amalgamation takes place and the duties and responsibilities of individuals change every effort will be made to ensure a smooth delivery of services during the transition period.

One proposed feature of reorganization is a strengthened Training and Certification Board. The intent is to structure the Board in a manner that will allow better representation of the industries of the Province. The Board, together with the Director of Apprenticeship and Trades Certification, will maintain the checks necessary to ensure that training in apprenticeable occupations is carried out properly and that trade certification programs are administered in the manner required.

As this report is prepared negotiations for a new training agreement with the Government of Canada appear to be at a standstill. At this point it is not known what the effect will be on training scheduled to commence in September. Hopefully, the difficulties will have been resolved by that time. Because of the lack of a formal agreement no progress has taken place in regard to the proposed apprenticeship study mentioned in earlier reports.

Statistics in regard to Apprenticeship and Trade Certification programs are provided in the table following. More detailed information is provided in tables and information attached.
